EDUCATION

University of British Columbia

Bachelor of Science in Computer Science | GPA 92.1%

Vancouver, BC

Sep. 2025 – May 2030 (expected)

TECHNICAL SKILLS

Languages: C++, Python, Java, HTML, CSS, JavaScript, R, Racket

Frameworks: ROS2, PX4, gtest, pytest, JUnit, Tailwind CSS

Developer Tools: Git, React.js, Vite, VS Code, Cursor, IntelliJ, Eclipse, Docker, Secure Shell (SSH), CMake, Bazel, Maven

Courses: Intro to Data Science, Statistics, Physics (Mechanics), Calculus I, II, III, Software Construction, Discrete Mathematics, Data Structures and Algorithms, Intro to Computer Systems, Matrix Algebra

TECHNICAL EXPERIENCE

Software Engineer

UBC UAS | C++, Python, Git

Sep. 2026 – Present

Vancouver, BC, Canada

- Autonomous aircraft onboard system/perception software sub-team

Software Engineering Intern

CHAOS Industries | C++, Python, Docker, Git

Jul. 2026 – Sep. 2026

San Francisco, CA, USA

- Tested custom robotics framework built on Rust and C++ by applying it to a real use case (detailed in Atropos section)
- Analyzed framework time and memory efficiency using **bash scripting**
- Communicated with mentors frequently while debugging in the company monorepo, used Git best practices

Software Engineering Intern

Atropos Group | C++, Python, ROS2, SSH, Docker, Git

Jun. 2026 – Jul. 2026

Sunnyvale, CA, USA

- Developed, tested, and deployed data logging software from a Ground Control station to autopilot computer
- Built telemetry streaming over UDP for **real-time** flight data visualization
- Optimized logic so **+60,000 messages** could be analyzed almost instantaneously for verification
- Acquired by Chaos — personally contributed to smooth integration into new company

PROJECTS

Activity Generator | Java, JUnit, JSON, React.js, Next.js, TypeScript, Spring boot, Maven

Feb 2026 - Present

- Designed and built an activity generating card game with JSON data serialization, following OOP principles
- Converted Java code into a **REST API** using Spring Boot, currently converting program into full-stack web app
- Originally used Java Swing and CSS for GUI, currently converting to TypeScript and React

Personal Website | React.js, Tailwind CSS v4, JavaScript, Vite, Vercel

May. 2026

- Built a personal website to showcase my projects, deployed with Vercel
- Implemented EmailJS API for my personal contact card, keeping secret information private using a .env file

Motion | HTML, CSS, JavaScript, Git

Apr. 2026

- First place** project in the youCode 2026 hackathon's beginner stream, built to be accessible and tailored for non-profits
- Full stack developer:** built the front-end using HTML, CSS, and Javascript, and implemented a back-end for user log-in using Supabase.

COMMUNITY INVOLVEMENT

CPSC 110 Undergraduate Teaching Assistant

University of British Columbia

Jan. 2026 – Present

Vancouver, BC

- Teach and support students, focusing on software development through theory and systematic program design
- Work in a team to **lead** labs of about 30 students, communicating **how** to implement recursive algorithms in functional programming and **why** they work.
- Internalize and enforce best practices in software development

Japanese National Honor Society Secretary

Homestead High School

May 2024 – May 2025

Cupertino, CA

- Teach students about Japanese culture in monthly meetings of 30+ students
- Focus on collaborative communication within 9 person leadership team and 50+ club members
