EDUCATION

University of British Columbia

BSc. Computer Science — GPA 92.1%, Dean's Scholar

Vancouver, BC

Sep. 2025 – May 2029 (expected)

Homestead High School

6 AP, 2 Honours Courses

Cupertino, CA

Aug. 2021 – Jun. 2025

EXPERIENCE

Software Engineering Intern

Atropos Group / Chaos Industries

Jun. 2026 – Sep. 2026

Sunnyvale, CA, USA

- HIL engineering; developed, tested, and deployed data collection and verification scripts on open source and private commercial unmanned aircraft hardware
- Used Python and C++ to write scripts, ROS nodes, and unit tests
- Used ROS2 to stream and receive data between ground control/flight computers in **real time**

CPSC 110 Undergraduate Teaching Assistant

University of British Columbia

Jan. 2026 – Present

Vancouver, BC

- UBC's main introductory Computer Science course, focusing on software development through theory and systematic program design
- Work in a team to **lead** and **teach** in labs of about 30 students, communicating **how** to implement different recursive algorithms in functional programming and **why** they work.
- Internalize and enforce good practices in software development

Japanese National Honor Society Secretary

Homestead High School

May 2024 – May 2025

Cupertino, CA

- Teach students about Japanese culture in monthly meetings of 30+ students
- Focus on collaborative communication within 9 person leadership team and 50+ club members

Waitress

Hajime Ramen

Jun. 2025 – Seasonal

Santa Clara, CA

- Work efficiently within a large, cross-functional team

PROJECTS

Personal Website | *React.js, Tailwind CSS v4, JavaScript*

May. 2026

- Built a personal website to showcase my projects.

Motion | *HTML, CSS, JavaScript, Postgres database, Git*

Apr. 2026

- **First place** project in the beginner stream at youCode 2026, UBC WiCS's *24 hour* hackathon.
- Full stack developer: grew proficiency with HTML, CSS, and Javascript, and implemented a back-end for the first time using Supabase.

LearnLoop | *HTML, CSS, JavaScript, React, Git*

Nov. 2025

- Contributed to front-end to build a functional mockup of LearnLoop in an *18 hour* hackathon

Scooped | *Java, Git*

Feb. 2024 – May 2024

- Collaborated in a team of 3 to design a timed, multi-stage game inspired by 'Cooking Fever!'
- Each food item exhibits unique properties, implemented using OOP concepts such as inheritance and polymorphism

AWARDS

Seal of Biliteracy in Japanese | *California Department of Education*

Jun. 2025

AP Scholar with Distinction | *College Board*

Jul. 2025

TECHNICAL SKILLS

Languages: C++, Python, Java, HTML, Tailwind CSS, JavaScript, R, Racket

Frameworks: ROS2, gtest, pytest, JUnit

Developer Tools: Git, VS Code, IntelliJ, Eclipse, Docker, Supabase

Course Work: AP: Computer Science A, Physics C: Mechanics, Calculus AB, Statistics. DSCI 100 (Intro to Data Science), MATH 101 (Integral Calculus with Applications), CPSC 110 (Computation, Programs, and Programming), CPSC 121 (Models of Computation), CPSC 210 (Software Construction)
